

Town of Elizabethtown

Fire Inspections

The Elizabethtown Fire Department handles all fire inspections inside the Town limits. The Department inspects according to the frequency rates established by the North Carolina Fire Prevention Code schedule.

What are some things I can do to get ready for an inspection?

- Have a fire extinguisher mounted in an obvious location.
- If you have an extinguisher already, it should have a recent inspection tag.
- Discontinue the use of any drop cords throughout the business used as permanent wiring.
- Remove any natural growth outside of the building.
- Make sure all exits are clear and free from any obstructions.

These are just a few items that we frequently see during inspections. Taking a look at the items above can help you get ready for your inspection and make your business a safe place.
